*The Neptune Ball / NA**Triton*

Open immediately once you return to game.:

You have been poisoned! The poison is very powerful and will kill you in 10 minutes. Since you are moderately nauseous, your CR drops to zero (and cannot be increased) and you must walk heel to toe. Only an exceptionally powerful magical artifact (999) can save you.

*The Neptune Ball / NA**Triton*

Open immediately once you return to game.:

You have been poisoned! You are slightly nauseous, now mute, and will die in 5 minutes if you do not receive medical attention or consume a healing potion. If you do either of these things, you are cured— you won't die and are no longer mute.
